Growth and diversity

Fields of activity of medical technology companies in Baden-Württemberg (companies may have several fields of activity)

The areas of **companion diagnostics, eHealth and telemedicine** have become an important focus for the medical technology sector, creating common interfaces between the healthcare sectors.

Taxable revenues and employee figures in the healthcare industry in Baden-Württemberg were calculated by the Baden-Württemberg Statistics Office on the basis of data held in the BIOPRO company database, as long as the relevant data had been submitted to the Statistics Office at the time of the survey. The data used in the survey were taken from 2016. BIOPRO's company database currently lists 840 medical technology companies, all of which carry out research, develop and/or produce in Baden-Württemberg (as of 7/2018). Figures were extracted for 799 medical technology companies. Suppliers and pure distribution companies were not included in these figures.
