About the 4C Close-up Webinar

Have you ever wondered where requirements are derived from, how this process is documented, and - above all - what this has to do with good product development? We provide the remedy!

In our webinar series "4C Close-up", our internal MII-experts discuss practical topics focusing on one of the 4Cs with experienced practitioners from advanced startups or established companies. We provide you with close-up insights into real world examples. Always with our goal in mind: Enabling you to help yourself!

Join our next 4C Close-up webinar about C2 and Requirements engineering & good product development. You will gain insights on how to derive, capture and implement product requirements for a medical device or IVD during the design and development process in order to achieve a MDR/IVDR compliant technical documentation.

- What? C2 | Requirements engineering & good product development
- Who? Stefan Hotz (Co-Founder & QARA, Kamed GmbH), & Dr. Henrike Stutzki (Startup Coach, MII)
- When? April 25, 5-6 pm CET, via MS Teams
