

Aktuelle Trends im Biomanufacturing – Erfolgsmodell Kooperation

Date:

24-Feb-2027 - 25-Feb-2027

Venue:

Ulm

Costs:

fee-based

Address:

Stadthaus Ulm

Münsterplatz 50

89073 Ulm

Directions:

📍 [How to find us](#)

Type:

Congress/Symposium

Organiser:

BioPharma Cluster South Germany

Language:

German

Collaborations are becoming increasingly important in the healthcare industry to bring complex innovations—such as novel drugs, medical technology, or diagnostics—to market more quickly.

In this event, experts from research, industry, and regulatory bodies will demonstrate how collaborations pool expertise across the value chain, shorten product and application development times, enable faster scaling, and enhance the security of supply for patients.

What can you expect?

Best practices, use cases, and discussions on successful collaboration models across the entire value chain of the healthcare industry.

The focus is on proposed solutions to specific key questions and obstacles:

- **Research & Development – Achieving More Together:**

“How can public-private partnerships accelerate the development of new active ingredients?”

“How can long-standing partnerships advance point-of-care diagnostics?”

- **Collaboration in Scaling, Production, and Supply Chains:**

“How can strategic partnerships be used as an alternative to the ‘one-stop shop’ strategy?”

“How can new business models be developed collaboratively among research institutions, startups, and industry partners?”

- **Time to Market, Product Lifecycles, and Regulation:**

“How can strategic partnerships accelerate and simplify the commercialization of complex biopharmaceuticals for patients?”

Presentations, discussions, roundtables, and networking

Interdisciplinary exchange with colleagues and technology partners on barriers to innovation, the opportunities presented by collaborative models for developing new solutions, and regulatory issues.

Why should you take part?

- **Firsthand insight:** Experts share their experiences in various areas of the healthcare industry’s value chain.
- **Best Practices:** Learn from existing use cases and work with other participants to develop strategic ideas.
- **Strengthen Your Network:** Meet leading figures in the biotech industry from the D/A/CH region, build valuable connections, and exchange ideas with fellow professionals.
- **Get Involved:** Your perspective will be incorporated into a collaborative magazine that brings together the ideas and proposed solutions developed during the process.

Workshop size

The number of participants is limited to 130 to ensure an efficient exchange.
