The event has already taken place!

The 20th Meet & Match anniversary will take place on the 5th of July 2022 under the title "**Best of Meet & Match – Everything You Always Wanted to Know About Meet & Match (But Were Afraid to Ask)**".

Do you always wanted to get an overview about the latest trends and innovations in healthcare industry? Participate in our Meet & Match to join representatives from the biotechnology, pharma and medical technology sectors.

Highlight projects from previous events will again be given a stage at the 20th anniversary to present new findings and developments.

The "Best of" edition of the Meet & Match events therefore covers all key topics and trends: surface technologies applied to medical devices, drug discovery, robotic surgery, diagnosis, smart implants, immuno-oncology... Additionally, a health panorama will give an overview of developments in the last ten years and two global talks will give insights into intellectual property and funding opportunities.

Why participate?

The Meet & Match addresses research institutions, companies and start-ups – mainly from Baden-Württemberg and Grand Est Region in France. The objective of the event is to establish new contacts and encourage participants to initiate cooperations or joint developments.

Highlight your expertise and your organization!

We offer you an unique opportunity to speak about your research group or company in order to enable intense networking opportunities.

During the **«Short presentation session»** participants may introduce their company or research group to enable intense networking opportunities. You can apply for a 2-3-minute short presentation upon registration **until June 17th, 2022**. Please note that the number of short presentations is limited and that the session is arranged for research institutions or companies being active in R&D or production. Selection is made by the organisers.

Please note, the pitchers have already been selected by the organisers.

Registration

The event will take place in Strasbourg, France. The participation is **free of charge**. For organisational reasons, prior registration is requested. Therefore, please fill out the registration form (S'inscrire à l'événement) on the website of our partners.

We look forward to meeting you in Strasbourg!
