Steered by its prestigious committee, the BioFIT conference programme is shaped to correspond to the interests of every player in the sector and to meet the expectations of its stakeholders, whose sharp minds operate in the fast-paced Life Sciences sector. The 2025 programme is rooted in four custom-made tracks, addressing the right funding sources for early-stage innovation, best practices in academia-industry R&D collaborations, winning ways to nurture early-stage assets and animal health highlights.

TRACK 1: Best practices in academia-industry R&D collaborations

TRACK 2: Nurturing and licensing early-stage assets

TRACK 3: From pre-seed to Series A: Accessing early-stage investment

TRACK 4: Animal health highlights

Start-up Slams

The Start-up Slams are a great opportunity for young companies (and particularly for start-ups seeking to raise a seed or a Series A financing round) to showcase their project in front of potential partners and investors.

Collaborative and Licensing Opportunity Presentations

The Collaborative and Licensing Opportunity Presentations enable TTOs, universities, research institutes and companies to showcase their early-stage technologies in front of potential partners, in order to entail a collaborative project and/or a licensing deal.

Animal Health Presentations

The Animal Health Presentations allow young companies, TTOs, universities, research institutes and companies to showcase their innovative project in front of potential partners and investors in the Animal Health sector.

BioFIT will continue online on December 8th, 2025
