As part of DMEA, Europe's leading industry event for healthcare IT, the regional health cluster "HealthCapital" and the local Enterprise Europe Network offer a range of activities.

HealthCapital hosts an excursion, various sessions and an evening reception at the Berlin-Brandenburg booth.

The Enterprise Europe Network Berlin-Brandenburg invites you to participate in the international partnering event "DMEA Business Meetings" taking place at the Exhibition Grounds Berlin (10 April 2024) and online (8-12 April 2024).

This event has been designed as a partnering platform offering an opportunity to meet potential partners for new business and R&D projects.

Representatives of companies, universities and research institutes offering or requesting innovative solutions, investigating new collaborations and searching for adequate project partners will get a great opportunity to discuss their ideas face-to-face in the pre-arranged meetings with international experts of interest.

Take the opportunity to achieve more visibility for your organization or business by setting up a profile on this page and find new international cooperation partners for research, technology and innovation.

Meetings last 20 minutes each. Participation in the matchmaking is free of charge.

A minimum of two confirmed onsite meetings is required to receive a free day pass to enter the DMEA Business Meetings. You will receive your e-code a few days before the event.

### **Main Topics**

- IT solutions for medical practices, laboratories and radiographers
- Software for hospitals, rehabilitation clinics and care homes
- Hardware und IT infrastructure
- Communication solutions
- Telemedicine solutions
- Medical technology (meets IT)

### **Why to participate**

- Use the event to initiate new business projects
- Meet providers of innovative technologies from throughout Europe
- Get in touch with potential partners for future co-operation
- Establish cross-border contacts for long-term business relationships
- Get the latest information about trends and innovations
