As technology continues to revolutionize the healthcare industry, such exciting field as smart health is about to explode in the coming years. By integrating cutting-edge diagnostic tools and the convenience of the remote care, smart health offers all

stakeholders a more efficient, effective, and accessible way to manage healthcare and lifestyle needs, especially in the areas with poor medical infrastructure.

We will cover following topics:

- Home Diagnostics: More than just a trend in post pandemic times?
- Insiders Review: How to address user needs with smart home diagnostic solutions?
- eHealth Solutions: The doctor in my pocket, can it work?
- Outlook: Regulatory and ethical constraints and future technologies.

Whether you are a physician, a researcher, a retailer or a healthcare entrepreneur, this event is the perfect opportunity to gain valuable insights, forge new partnerships and gain a deeper understanding of the legal and ethical considerations that come with smart health.

**Note: the event will be held in GERMAN language.**
