## Visit the UK's Premier Medical Device Design, Development & Manufacturing Event

In a post Brexit era, the UK now stands alone as a global centre of excellence in Life Sciences.

The Medical Device design and manufacturing industry stands proud in that category and has its own unique standards, epitomised by ISO 13485, the

Quality Management System for organisations required to demonstrate its ability to provide medical devices that consistently meet client and regulatory requirements.

In order to achieve and maintain that standard, medical device engineers in all disciplines from Design and R& D to Process, Application, Product and everything in between, have to ensure that they are partnering with suppliers who are able to work to such exacting standards.

Medical Technology UK is not a horizontal design and manufacturing event. It is a niche, vertical event, devised to bring medical device manufacturers together with suppliers to the industry. Time is a precious commodity and this new event is designed to maximise everyone's use of their time, by taking the guess work away and giving the medical device and engineering community an event that delivers solution providers, for all their needs, in one place, and at one time.

## Why Visit?

- Discover the latest innovations in design and manufacturing
- Speak face-to-face with over 150 key suppliers
- Hear from industry thought-leaders at the FREE Learning Programme
- Network with the UK medical technology sector
- Be inspired by the experiences of leading female engineers at the Women in MedTech Forum

Whatever your role within the Medical Device Manufacturing industry, you have a part to play. Medical Technology UK is your platform to do this.

**Register for free entry to the Exhibition and Learning Programme, including the Women in MedTech Forum, Young MedTech Entrepreneurs Assembly & the Future of Medical Device Design Congress**

## VISITOR PROFILE

Medical Technology UK is an Exhibition showcasing the latest products and services from specialist supply chain companies serving the medical device design, development and manufacturing community. Together with a comprehensive Learning Programme and the Women in MedTech Forum it is a unique event and free to attend. The event is specially designed and intended for the following and associated job functions:

### Job Function

- Design Engineers
- R&D Engineers
- Project Engineers
- Process Engineers
- QA/QC Engineers
- Software Engineers
- Validation Engineers
- Regulatory/Legal Affairs
- Corporate Management
- Entrepreneurs

### Organisations

- Medical Device Manufacturers
- Major OEMs
- Contract Manufacturers
- Start-ups
- SMEs
- University Spin-Outs
