Discussion of the newly proposed EU laws that will have a significant impact on the future of healthcare systems

Evolving policy and regulatory paradigm that will shape EU's healthcare landscape for generations to come:

- The Data Governance Act
- The Data Act
- The AI Act
- The European Health Data Space

At this first Hippro AI Summit, which takes place on 1-2 December 2022, experts will discuss the impact of these regulations. More particularly, we will discuss and analyse its impact on open and democratised life saving knowledge, our fundamental European right to healthcare and the core principle of solidarity. Do these regulations change the core principles (eg. solidarity) of our future healthcare systems, and will they empower and protect small and medium businesses? All questions we will discuss during this first Summit.
