After its successful première in 2023 and an impressive growth in 2024, Quantum Effects has established itself as the leading annual international exhibition and conference for application-oriented quantum technology. With its international focus, Quantum Effects is advancing Europe's role in the global race for quantum technology creating a platform for inspiration, collaboration and the transfer of knowledge from research to market-ready applications.

Quantum technologies meet user industries

- Are you looking for technologies that can revolutionise medical technology, imaging and diagnostics?
- Do you need solutions for logistics and transportation?
- Does your company need to save time in the energy and financial sectors?
- Do you need to enable complex computing processes in the shortest possible time?
- And do you want answers to questions that have yet to be answered?

Then Quantum Effects is the platform to make your business fit for the future. Get in touch with quantum technology now and

find out how it can add value to your business!

Build know-how for your industry - it's a competitive advantage that may soon be impossible to catch up with!

The adventure of the future starts here: we look forward to meeting you!

Diverse programme for all target groups

Experience the future of quantum technologies first hand! Quantum Effects offers a unique programme that combines targeted knowledge transfer, world-class presentations and valuable networking opportunities. Whether you are an industry expert, a user, a young talent or a decision-maker, you will find tailor-made formats that give you direct access to the latest developments in quantum technology.
