Since 2019, Shift Medical has established itself as Europe's leading community for Virtual Reality, Augmented Reality and Mixed Reality in healthcare. 2500 members are actively engaged in our worldwide community by attending virtual and physical events and continuously advancing Medical Extended Reality by building strong collaborations across academia, industry and government agencies. In 2022, our flagship congress Shift Medical will focus on strengthening the open and structured knowledge exchange between healthcare providers, businesses, governments and the general public with an exclusive in-person congress in the beautiful city Heidelberg in Germany.

If you are bored by anonymous online conferences, shake your head watching overpromising marketing claims and biased self-promotional talks, and you miss deep in-person networking opportunities with colleagues who care about a sustainable Medical XR ecosystem, then Shift Medical 2022 is your congress.

Dedicated to evidence-based principles we will continue to shape ethical, regulatory, technological and data safety standards across the world for virtual, augmented and mixed reality in medicine.

Parallel to the congress we will offer businesses and academic institutions the opportunity to exhibit their products and services in our Medical XR tech area.

You need to apply for tickets in order to take part in the Shift Medical congress.
