To the event and registration

Real progress in healthcare happens when science, technology, and practice come together. Innovation alone is not enough – the real challenge lies in achieving a tangible impact.

Technological advancements are moving at a rapid pace, but how do we ensure that innovations are not just developed but

also successfully integrated into healthcare? How can we bridge the gap between research and application and work together on impactful solutions? Throughout the day, leading experts will share their insights and experiences on what it takes to translate technology into real-world healthcare improvements.

The programme will feature inspiring keynote speakers, interactive sessions, and panel discussions, all focused on collaboration and impact. There will also be plenty of opportunities to connect with professionals dedicated to shaping the future of healthcare. Whether you are involved in research, technology development, or practical implementation, this event will help you build meaningful connections and work towards real change.
